EDUCATION

University of California, Irvine

Irvine, CA

- *Bachelor of Science in Software Engineering* *Expected Graduation: June 2028*
 - Relevant Coursework: C++ Programming and Memory Management, Data Structures & Algorithms, Computer Architecture and Organization, Database Systems, Software Engineering

PROJECTS

Posture Tracker | Python, Django, MediaPipe, OpenCV, OAuth2/OIDC, PostgreSQL, PySide6

Oct. 2025 - Dec. 2025

- Built a real-time posture-monitoring app using computer vision (MediaPipe/OpenCV) that automatically detects poor sitting posture and sends live alerts, removing the need for manual self-checks.
- Added secure Google sign-in (OAuth2) with automatic session renewal, so users could log in safely without ever getting logged out during use.
- Built a Django backend with a PostgreSQL database that stores each user's posture history efficiently, cutting unnecessary data storage by over 95% while still tracking accurate trends.
- Created a desktop dashboard (PySide6) with live charts showing posture trends over time, giving users clear, at-a-glance feedback on their habits.

Budgett – Full-Stack Expense Tracker | Python, Flask, React, PostgreSQL, Docker

July 2026 - Aug. 2026

- Built and deployed a full-stack expense tracking application with **Flask REST APIs and React**, implementing **6 endpoints** for authentication and expense CRUD operations
- Designed a relational **PostgreSQL** database with SQLAlchemy, enforcing foreign-key relationships and ownership validation
- Containerized the application stack with **Docker Compose**, integrating React, Flask, and PostgreSQL with an **Nginx reverse proxy** and **Gunicorn production server**
- Implemented **JWT authentication** and **25+** automated pytest cases covering API functionality, validation, and error handling
- Configured a **GitHub Actions CI/CD pipeline** to continuously validate backend functionality on every PR.

EXPERIENCE

Coding Instructor

May 2025 - Jun. 2026

Code Ninjas

Los Alamitos, CA

- Debugged logic and syntax issues across **60+ codebases**, developing systematic troubleshooting and problem-solving skills
- Taught JavaScript, OOP, **Git & version control**, and data structures through hands-on projects and 1:1 mentorship

Software Engineering Mentee

Oct. 2025 - May 2026

Google Workplace Mentoring

Irvine, CA

- Completed an 8-month 1:1 mentorship with a senior Google Software Engineer focused on **software design, debugging, technical problem-solving, and engineering best practices**

SKILLS & INTERESTS

Languages: Python, C++, JavaScript, TypeScript, SQL, Bash

Backend & Systems: Flask, Django, REST APIs, PostgreSQL, Docker, Linux

Testing & Tools: Copilot, Claude, AI tooling, pytest, GitHub Actions, Git, GitHub, Docker Compose,

Interests: Artificial Intelligence, Computer Vision, LLMs, Systems Programming, Cloud Computing, Distributed Systems
