EDUCATION

University of California, Irvine

Irvine, CA

Bachelors of Science in Software Engineering

Expected 2028

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

Frameworks & Libraries: Flask, SQLAlchemy, React.js, Node.js, Express, MongoDB, Bootstrap.js

Database Technology: PostgreSQL, SQL, MongoDB (NoSQL)

Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm, MacOS

Concepts: Object-Oriented Programming, REST API Design, JWT Authentication, Relational Database Design, Version Control, SDLC, Algorithms & Data Structures, JSON, Code Review

PROJECTS

Appli - Job & Internship Tracker | Python, Flask, Postgresql, SQLAlchemy, Git

May 2026 – July 2026

- Owned end-to-end development of a full-stack, object-oriented Python application, from database design through backend implementation, security, and deployment, applying core OOP principles across a multi-user system with Flask-Login authentication and Bcrypt password hashing
- Designed a relational data model with foreign key constraints and SQLAlchemy 2.0 ORM-mapped columns, writing and debugging code to enforce referential integrity across User and Job entities
- Strengthened application code quality and security by enforcing per-user data isolation and ownership verification on all mutating routes, reducing unauthorized data access
- Used Git for version control throughout the development lifecycle, tracking changes and iterating across features independently

WORK EXPERIENCE

Coding Instructor | Javascript, Microsoft Makecode

May 2025 - Jun 2026

Code Ninjas Los Alamitos

Los Alamitos, CA

- Diagnosed and resolved logic errors and syntax bugs across 60+ student codebases, building strong debugging skills directly applicable to code review and quality assurance
- Taught object-oriented programming principles and core data structures (arrays, objects) through hands-on JavaScript game development projects
- Collaborated one-on-one with students, communicating technical concepts clearly and adapting instruction pace and project complexity to accelerate individual skill acquisition

LEADERSHIP & ACTIVITIES

Software Engineering Mentee | Google

Oct. 2025 - May 2026

Google Workplace Mentoring

Orange County, CA

- Completed an 8-month 1:1 mentorship with a senior Google Software Engineer covering software engineering fundamentals, workplace expectations, and career development
- Built a personal technical learning roadmap across languages, frameworks, and projects, informing a focused path toward backend engineering and systems
